Professional Summary

Solutions Architect with extensive experience designing secure, scalable, multi-tier technology solutions across public sector, transportation, healthcare, automotive, and enterprise environments. Expert in current-state and target-state architecture, application and integration design, technology roadmapping, architecture governance, cloud platforms, API/service-based integration, and low-code modernization. Skilled in system, process, and data modeling using TOGAF and ArchiMate frameworks. Proven ability to work with Enterprise Architects, business stakeholders, developers, project teams, vendors, and executives to define requirements, evaluate solution options, establish standards, manage risk, and guide implementation. TOGAF-certified with hands-on experience across Azure, AWS, Dynamics 365, Power Platform, SharePoint Online, API Gateways, Microsoft Fabric, and modern web application architectures.

Core Competencies

- Business Capability Modeling
- API & Services-Based Architecture
- Technology Strategy & Roadmapping
- Architecture Review Boards & Project Gating
- Microsoft Power Platform
- Digital Transformation and Innovation
- Cross-functional Leadership & Mentoring
- Requirements Analysis & Stakeholder Facilitation
- SDLC, Agile & DevOps
- Cloud technologies (Azure and AWS)
- System, Data & Process Modeling
- Enterprise Architecture (TOGAF, ArchiMate)

Work Experience

Mohawk Medbuy Corporation (Burlington, Ontario)

Solutions Architect, Business Solutions

August 2025 – August 2026 (Permanent Full-Time)

Reported to Director of Business Solutions that was responsible for delivering the Microsoft Dynamics 365 Business Central solution to the hospitals. Created data mapping documentation and developed architecture views for the project.

- Developed architecture documents for the solutions that utilize AWS, Microsoft Business Central, and .NET technologies for Accounts Payable, Purchasing, Electronic Requisitioning, and Finance.
- Created architecture diagrams for AI projects related to Contract and Invoice Genies.
- Designed and implemented a requisition submission portal integrated with Microsoft Dynamics 365 Business Central, enabling hospital users to securely submit requisition details directly into the ERP system.
- Developed data mapping documentation for the Enterprise Reporting component for the Business Central solution.
- Managed the Defect Log using Power BI for the implementation of Microsoft Business Central solution during SIT and UAT testing.
- Worked with Developers and Project Manager to implement an internal Data Warehouse solution using Microsoft Fabric to improve the processing of internal corporate reports.
- Contributed to business continuity and disaster recovery planning, supporting risk mitigation and operational resilience.

ONxpress Transportation Partners Inc. (Toronto, Ontario)

**Senior Program Manager & Project Management Office Lead, Information Technology Services
September 2023 – July 2025 (Permanent Full-Time)**

Reported to Head of Applications that was responsible for delivering all major applications for the organization. Implemented Transit Operations technologies and developed architecture views for the program.

- Established and governed the Project Management Office for North America's largest transportation initiative (\$1.6B GO Expansion Project).
- Led end-to-end delivery of IVU Transit Operations cloud technologies (AWS SaaS) supporting Train Crew, Fleet, Service Planning, and Network Operations Centre.
- Developed architecture documents (Conceptual, Logical, Physical) using TOGAF and the Blue Dolphin platform.
- Architected secure authentication and authorization solutions leveraging SSO, MFA, and identity federation across enterprise applications.
- Modernized legacy integrations by implementing API gateways and reusable integration services, reducing maintenance overhead and improving system performance.
- Managed cross-functional teams including solution architects, developers, quality assurance analysts, and project managers across all environments.
- Created key deliverables such as project plans, charters, roadmaps, risk logs, data models, functional and non-functional requirements and traceability matrices
- Utilized Azure DevOps to track project progress, manage backlogs, and coordinate cross-functional teams, ensuring timely delivery of sprints and enhancing transparency across stakeholders.
- Able to communicate complex technical solutions to executive stakeholders, ensuring execution and insights.
- Managed a team of contractors and vendors for the Operation Systems Program, and served as the primary point of contact between the client, contractors, and other stakeholders involved in the project.
- Worked with the Product Manager of the team to develop the roadmap of the Operations System technologies.
- Applied big-picture thinking to align cross-departmental priorities, resolve conflicts, and accelerate organizational change outcomes.
- Managed the project budget, including tracking expenses, forecasting costs, and ensured that the project was within budget.
- Developed regular project status updates to stakeholders, such as risk reports, project presentations, testing results, financial proposals, and architecture documentation.
- Worked with project stakeholders to identify and allocate resources, create schedules, and establish timelines for the Operation Systems Program with the use of MS Project, Smartsheet, and Continuum.
- Developed project plans, including defining project scope, goals, customer journey maps and deliverables for the Operation Systems Program.

Toyota Canada Inc. (Scarborough, Ontario)

**Solutions Architect, Enterprise Business Solutions
June 2021 – August 2023 (Permanent Full-Time)**

Reported to the Manager of Enterprise Business Solution that was responsible for managing the internal applications within the organization. Modernized the organization's intranet site and 7 internal business applications.

- Modernized internal applications across HR, Marketing, IT, Finance, Legal, and Parts Operations using Microsoft Fabric, Microsoft Power Platform (Power Apps, Power Automate, Power BI, Power Virtual Agents) and Microsoft SharePoint Online.
- Led cloud migration of on-premise SharePoint sites to Microsoft SharePoint Online using ShareGate, promoting a Cloud-First strategy.
- Designed and implemented low-code/no-code business solutions and automated workflows to improve efficiency across departments.
- Developed architectural roadmaps and future-state visions using Archi for Microsoft SharePoint Online and Power Platform tools.
- Implemented enterprise tools like DocuSign, and authored deployment architecture diagrams.
- Migrated legacy workflows (Nintex) to MS Power Automate, ensuring business continuity and improved process automation.
- Managed vendors and developers to develop internal applications.
- Reviewed existing and emerging technologies and market trends to determine their potential impact on the enterprise's strategy and architecture.
- Analyzed current business and technology solutions and environments to detect deficiencies and recommended improvements.
- Collaborated with cross-functional teams to implement end-to-end low-code/no-code applications using Microsoft Power Platform.
- Reviewed existing and emerging technologies and market trends to determine their potential impact on the enterprise's strategy and architecture.
- Presented project updates to the Management Team monthly to explain technical concepts of the implementation of MS Power Platform solutions to a non-technical staff.
- Explained technical changes for implementation during Change Advisory Board meetings for security patch implementations on production ready applications.
- Collaborated with cross-functional teams to implement end-to-end low-code/no-code applications using Microsoft Power Platform.

Metrolinx (Toronto, Ontario)

Enterprise Architecture Specialist, I&IT Planning & Architecture

August 2017 – May 2021 (Contract Full-Time)

Reported to the Manager of Enterprise Architecture that was responsible for ensuring solutions would adhere to Architecture best practices and standards such as FIPPA. Led Solution Architects through the Architecture Review Committee process to ensure that solution adhered to TOGAF, Zachman, ArchiMate, policies and standards for over 20 projects.

- Developed enterprise architecture artifacts (Conceptual, Logical, Physical) for major IT projects using TOGAF and ArchiMate 3.0 and mentored other Architects.
- Developed business capability models and processes using Sparx Systems Enterprise Architect and BizzDesign and managed the repository of all architecture artifacts.
- Provided Knowledge Management for documenting architectural decisions, maintaining the architecture repository, architecture governance, architecture tools, and architecture patterns and frameworks for cloud-based solutions.
- Supported Enterprise Architects towards the development of Enterprise Architecture Artifacts and attended Gate Review and Bi-Approval weekly meetings as Enterprise Architecture representative.
- Facilitated sessions with Senior Management and vendors to evaluate architecture assets, risks and solution options to arrive at an agreed solution.
- Developed taxonomy for Configuration Management Database in ServiceNow

- Assisted Data Architects to develop data models based on the Data Management Body of Knowledge (DMBOK)
- Collaborated with all relevant internal and external stakeholders to review the objectives and constraints of I&IT solutions and support conformance with current Enterprise Architecture reference architecture, standards, policies and roadmaps, which includes TOGAF methodologies and ArchiMate 3.0.
- Reviewed solutions at Architecture Review Committee meetings to ensure that they were in alignment with best practices for the perspectives of Business Architecture, Applications Architecture, Data Architecture, Technology Architecture and Security Architecture.
- Led Architecture Review Board sessions to review solution architectures and detailed designs to ensure they comply with enterprise architecture standards and policies to provide architectural approvals for project gating.
- Maintain the inventory of all Enterprise Architecture policies, standards, patterns, reference architecture documentation, decision records, and architectural models.
- Generated business architecture artifacts, process models, and current and future state architecture diagrams for transit projects.
- Created Business Architecture diagrams and roadmaps for initiatives such as Office 365 migration, SQL consolidation, Okta Implementation, GO Wi-Fi, and Transit Operations.
- Worked on various pilot projects for business teams utilizing Microsoft Power Platform tools, Salesforce, and technology teams utilizing Docker and Ansible.
- Configured entities, workflows, business rules, and forms in Microsoft Dynamics 365 to streamline lead-to-opportunity and case management processes.
- Collaborated with cross-functional teams to map business processes and translate them into Microsoft Dynamics 365 solutions, reducing manual work by automating workflows.
- Conducted user training and developed documentation for Microsoft Dynamics 365 modules, resulting in increased user adoption and satisfaction.
- Led the end-to-end configuration and deployment of Dynamics 365 Sales and Customer Service modules with integrations with Microsoft SharePoint Online and Power Platform.
- Implemented Azure Data Lake and Azure Databricks to ingest, process, and analyze customer Wi-Fi usage data for data integrations and ETL processes.

eHealth Ontario (Toronto, Ontario)

Business Analyst, Information Technology Systems & Services

May 2012 - July 2017 (Permanent Full-Time)

Reported to Management in Service Operations that were responsible for managing applications that are running. Gathered requirements and developed business cases for 10 projects and automated about 100 operational reports.

- Led enterprise risk management (ERM) initiatives, including the development of the Enterprise Risk Profile, ERM Framework, Risk Registry, and RSA Archer GRC Platform implementation.
- Collaborated with stakeholders (Ontario Ministry of Health and Long-Term Care, Ontario Public Service, Treasury Board Secretariat) on enterprise risk governance, compliance reporting, and strategic alignment with provincial health priorities.
- Delivered business analysis and reporting support for major healthcare IT projects such as Diagnostic Imaging, Ontario Laboratories Information System, and Connecting GTA to enhance clinical data sharing across Ontario.
- Created and automated operational reports including Information Technology Service Management (ITSM), key performance indicators, and service level agreement metrics using SAP Business Objects, Crystal Reports, MS SQL, and Remedy ITSM for all ITSM core functions.
- Built dashboards, scorecards, and SharePoint tools to improve performance monitoring and operational transparency across IT Service Centre and Service Management.

- Used agile and lean methodologies to support iterative improvements in service delivery and risk reporting processes.
- Developed business cases, policy recommendations, request for proposals, request for quotations, request for enhancements, solution documents, training documentation for reporting, payment agreement form and transfer payment agreement.
- Created request for enhancements, solution documents, training documentation for reporting purposes for Business Services implementation projects.
- Summarized Architecture review notes for the IT Vice President to make decisions at project gating reviews and provide recommendations to projects for gating/ checkpointing.
- Identified risk trends, analyzed current business processes, and assessed internal controls.
- Contributed to the development of High-Risk Reports to Ontario Ministry of Health and Long-Term Care.
- Assisted Treasury Board Secretariat to organize the Risk Management roundtables and events for Ontario Public Service.

Education

Master of Science McMaster University, Hamilton, ON)

April 2013

Major Area of Study: Health Informatics (Information Systems)

Honours Bachelor of Science (McMaster University, Hamilton, ON)

April 2011

Major Area of Study: Mathematics and Statistics (Statistics Specialization)

Certifications

- Project Management Professional (PMP) (Work in Progress)
- Microsoft Certified: Dynamics 365 Fundamentals (November 2025)
- Microsoft Certified: Power Platform Fundamentals (January 2023)
- AWS Certified Cloud Practitioner (December 2021)
- Udemy DA-100 Certification: Analyzing Data with Microsoft Power BI (April 2021)
- WorkshopPLUS Dynamics 365 Customer Engagement: Email and Collaboration 1 Day with Lab Certificate (February 2021)
- Microsoft Certified: Azure Fundamentals (October 2020)
- The Open Group Certified: TOGAF® 9 Foundation (June 2020)
- Coursera, Applied Data Science Specialization offered by IBM (March 2020)
- BiZZdesign Enterprise Studio Basic and Advanced & ArchiMate 3.0 Foundation (June 2019)
- School of Continuing Studies, University of Toronto: Enterprise Architecture (December 2018)
- WorkshopPLUS - Microsoft Azure: PaaS Solutions for Developers (October 2018)
- Effective Business Writing (February 2017)
- Facilitation Skills Development (February 2016)
- 20461 Querying Microsoft SQL Server (M20461) (June 2015)
- ITIL Intermediate Certificate in Service Design (December 2014)
- ITIL Intermediate Certificate in Service Operation (April 2014)
- Toastmasters International Competent Communicator (April 2014)
- ITIL Foundation Certificate in IT Service Management (September 2013)
- SAP Business Objects Web Intelligence 3.0/3.1: Report Design (April 2013)
- Communicating for Clarity (February 2013)
